DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 7 is rejected under 35 U.S.C. 102(e) as being anticipated by Uesugi (US Patent No. 6,018,552).

Regarding claim 7, Uesugi teaches of a level adjusting circuit (Figure 16) comprising: a plurality of bit shifters that shift input baseband signals to the right by different certain bits (Figure 16 & col. 12, lines 55-59) a plurality of switches for selecting outputs from said respective bit shifters in accordance with a desired gain desired to be set (Figure 12 and col. 12, lines 66-67); and an adder for adding outputs from said respective switches for output as one signal (Figure 16 & col. 12, lines 59-66).

Allowable Subject Matter

Claims 1-6 and 8-17 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 3, 5, 6, 15 and 16, please see reasons for allowance in office action dated 10/9/03.

Regarding claims 1, 2, 4, 8-14 and 17, the prior art of record, specifically Kato fails to specifically disclose a D/A converter for converting the baseband signal, which is a digital signal, into an analog signal. Furthermore, since Kato fails to disclose a D/A-converter or any problem associated with not having the D/A converter. Therefore, there the prior art of record not only fails to specifically disclose all the limitations but further fails to provide motivation to fix the non-existent problem of the conventional transmitter by applying a gain set value in any way related to the non-existent D/A converter, still less the gain set value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments filed 12/18/03 with respect to claim 7 have been fully considered but they are not persuasive.

Regarding applicant's arguments, applicant argues that Uesugi fails to specifically disclose a plurality of switches for selecting outputs from the respective bit shifters in accordance with a desired gain. However, it is examiner's contention that column 12, line 55- column 13, line 15, disclose bit shifter 168, 164 and 163, both for shifting the adders output a single/double etc. bit right to provide the value of Z where a selector 169 selectively supplying one of the values 0, Z, 2Z and 3Z according to the second quadrant information from the quadrant calculator 161; an

inventing circuit 43 for inventing each bit of the subtracter 13 output according to the second quadrant information. Therefore, a plurality of switches are inherently utilized in inventing circuit 43 in order to select outputs from the bit shifters with respect to the desired gain.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
